

Register account in the account register

How to register your account in Swedbank's account register

- 1 Go to swedbank.se/kontoregister. Click on "Anmäl ditt konto till kontoregister".
- 2 Confirm your identity with your Mobile BankID or security token. You will see the heading 'Payment advice' and 'Redeem your payment advice and register your account' after you have logged in.
- 3 If you do not use an internet bank with Swedbank/a savings bank, you will need to approve the terms of use for the bank's Service Portal. NB! This will not automatically make you a customer of ours.
- 4 Click on 'Register an account for future deposits'. Select an account for future deposits in the drop-down list or enter your account number with another bank. Then click Continue.
- 5 Check and approve the registered account.
- 6 You're ready to go! The money will go into the selected account when the payment is made by the payer.

Who can digitally register their account on Swedbank's account register?

As a private individual, you can digitally register your bank account on Swedbank's account register. The following is required:

- 1 You are a private individual over 18 years of age.
- 2 You have a Swedish personal identity number.
- 3 If you are a customer of Swedbank or the savings banks, you need to have a BankID or Mobile BankID (or a security token from Swedbank or a savings bank). If you are not a customer of Swedbank or the savings banks, you need to have a Mobile BankID.
- 4 You can register an account from any Swedish bank. You do not need to be a customer of ours, and account registration does not mean that you automatically become a customer.
- 5 You can only register your own account or account that you share with another account holder.

If, for example, you do not have a Mobile BankID, have a protected identity or coordination number ("samordningsnummer"), there are instructions on how to register your bank account on Swedbank's website.
