Swedbank Robur Access Asien

ISIN: SE0013876968

This fund is managed by Swedbank Robur Fonder AB, Corporate registration number 556198-0128, a subsidiary of Swedbank AB (publ).

Objectives and Investment Policy

The fund is an equity fund which invests in companies across a different industries in Asia excluding Japan. The objective is to emulate as far as possible the development of the index MSCI AC Asia Ex Japan Net, which is a market value index that follows the development of large and medium-sized companies on the Asian equity markets, excluding Japan. The fund intends to follow MSCI AC Asia Ex Japan Net mainly by purchasing the equity included in the index.

The management of the fund is index-oriented and strives to emulate the composition of its index. However, differences in performance between the fund and index are expected to arise as the fund complies with the fund company's policy for responsible investment and undertakes in-depth sustainability initiatives within the framework of the investment process. This means that equity that is included in the index may be excluded because it does not meet the sustainability requirements and that companies with good sustainability initiatives are valued when building the portfolio. The fund's capacity to follow the index is affected by transaction costs arising from reinvestment of dividends, management of the flow and changes in the index.

Further information on the company's policy for responsible investments and the fund's deep sustainability initiatives can be found in the fund's information brochure.

You can usually buy and sell fund units every banking day through our dealers.

The Share Class does not issue dividends.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their investment within 5 years.

Risk and reward profile

The risk and performance indicator shows the correlation between risk and possible returns of investing in the fund. The indicator is based on how the fund value has changed over the last five years. This fund is in category 6, which indicates there is a risk that the value of shares in the fund can either increase and decrease. Category 1 does not imply that the fund is risk free. The risk class may change over time. As the indicator is based on historic data which is not a guarantee of future risk and performance.

Equity funds normally have higher potential for long-term value growth. But any investment in an equity fund also has a high risk, as prices may fluctuate significantly in equity markets.

Material risks in the fund that are not fully reflected in the risk/return indicator are:

- Concentration risk. Concentration of investments in a single region (Asia) with a high proportion of emerging markets increases the fund's risk.
- Currency risk. The funds invests in securities denominated in currencies other than Swedish kronor, and are therefore affected by exchange rate fluctuations. As the fund usually uses derivatives on a small scale, this affects the fund's risk profile to a certain extent. The use of derivatives may vary periodically.
